Salt Lake City, UT 84117

Dear Snyderville Basin Water User:

The following water users are required to prepare Water Use Plans and submit them to this office each year:

Clissold Investment Company
Gorgoza Mutual Water Company
Grayhawk / DMB Park City LLC
High Valley Water Co.
Mountain Regional Water Special Service District
Osguthorpe
Park City
Summit Co. Service Area No. 3
Summit Water Distribution Company

Please submit your 2012 Water Use Plan to this office before December 12, 2011.

Enclosed is a copy of your 2011 Water Use Plan with the year changed to 2012. Please review the enclosed plan, make any necessary updates and corrections, and return it to this office with a letter with the following:

- (1) Indicate your 2012 Water Use Plan submitted is within the limits of the approved water rights and any applicable operating agreements or contracts you have entered.
- (2) Describe or explain any revisions or updates to your plan, such as changes in water right status (new application approvals, withdrawn, replaced, contracts, etc.) and water distribution facilities (new or changes in pipelines, imports, exports, flumes, meters, access, etc.).
- (3) Identify any applicable contracts or agreements including contract numbers and quantities of storage under each exchange contract with Weber Basin Water Conservancy District or other entities that influence water delivery/distribution.

The primary purpose of the Water Use Plan is to provide the State Engineer and the water commissioner with the information necessary to properly monitor and regulate the distribution of water on the Weber River Distribution System. A secondary benefit is the plan helps water users better understand the water rights they use. Water Use Plans do

not identify all possible limitations associated with each water right. However, if each individual water right and applicable agreement is followed, the Water Use Plan should correctly summarize the total use at the sources. Water users are responsible for compliance with the limits of their water rights and any other applicable contracts or agreements.

Your Water Use Plan may be periodically updated if necessary. Reasons for updates may include changes in the water rights themselves or where they are used to remain within plan limits.

The Deputy Water Commissioner, under the direction of the Water Commissioner and the Office of the State Engineer, will report water deliveries under each plan. These measurements are needed to operate the distribution system. Your total water use from each source will be included in the water commissioner's annual report each year. The Deputy Commissioner will monitor the actual use so everyone is aware of the use and how close it is to the plan limits.

Many of the Snyderville Basin entities also measure and report their own water use each year under the Division's Public Water Supply Water Use Program. Please keep in mind that water deliveries reported under that program must also comply with the water right limits and this planning will also help with those efforts.

Thank you for your continued planning efforts. If you have questions regarding your water rights, please contact Ross Hansen, Regional Engineer, at (801) 538-7397. If you have any questions regarding the Water Use Plans, please call me at (801) 538-7469 or Jared Manning, Assistant State Engineer, at (801) 538-7380.

Sincerely,

Ben L. Anderson, P.E.
Distribution Engineer, Field Services
